SUMMARY

Junior Fullstack Developer with experience in Python (Flask), React, and PostgreSQL, currently at ASML developing internal software systems and backend solutions. Proficient in API design, database management, and scalable web applications, with a strong foundation in UI/UX and frontend development. Seeking growth opportunities as a software engineer.

WORK EXPERIENCE

Feb 2026 - Jul 2026
ASML - Internship | Fullstack Development

- Developed an internal centralised software package index to improve package management for 40K+ internal users
- Designed and implemented backend architecture using Python (Flask Blueprints), PostgreSQL and OAuth
- Improved development workflow by enabling structured package access and reducing manual handling processes

Jun 2024 - Feb 2026
Fontys ICT | ICT Assistant

- Provided support for Git, VPN, and server-related issues
- Resolved 5K+ technical issues across Windows or macOS

Jun 2024 - Present
Proxy | Vice President, Treasurer

- Managing bookkeeping for over € 150,000 using Moneybird and Excel.
- Monitoring six different committees and 250 members.

LANGUAGES

- English (C1)
- Dutch (B1)
- Persian (C2)

ADDITIONAL INFORMATION

Leadership:
